# BANF:
Mission to Mars

A presentation on exploration and advancement on the study of planetary rovers.

Mission to Mars:

Mission to Mars is a week long project where groups of young individuals that have an interest in computer science/ engineering come together to program a rover through a set of challenges. Then to present at the end of the week in order to impress investors in the hopes of winning. It helps build team skills and lets business professionals give advice to succeeding in the technology business.

MISSION TO MARS
WORK EXPERIENCE
15th-19th JULY 2019

BANF:

BRODEY: Lead engineer.

ARIF: Sub- programmer

NOE: Lead programmer

FINN: Team Manager

BANF:

- All members are from Penair School
- We all choose Mission to Mars as our work experience placement because we wanted to experience programming in the workplace and to meet professionals in the business.

DEMO:

Please watch the stage for a quick demo on our rovers abilities:

Retrospective:

We weren't always at this stage though it took us time and effort and with that came our achievements and our setbacks.

Conclusion:

To conclude this presentation we would like to open the room for questions so feel free to ask us about any queries you have with our demo/ team.

Conclusion:

That is the end of our presentation.
